Neoplasm - Wikipedia Secondary neoplasm refers to any of a class of cancerous tumor that is either a metastatic offshoot of a primary tumor, or an apparently unrelated tumor that increases in frequency following certain cancer treatments such as chemotherapy or radiotherapy. Tumor Grade: Grading Systems & Treatment Options The factors used to determine tumor grade can vary between different types of cancer. Tumor grade is not the same as the stage of a cancer. Cancer stage refers to the size and/or extent (reach) of the original (primary) tumor and whether or not cancer cells have spread in the body. Brain Tumor Grades & Types - ABC2 Primary brain tumors are named according to the type of cells or the part of the brain in which they begin. For example, most primary brain tumors begin in glial cells. This type of tumor is called a glioma.

Adult Primary Liver Cancer Treatment (PDQ)â€”Patient ... External radiation therapy is used to treat adult primary liver cancer. New types of treatment are being tested in clinical trials. Information about clinical trials is available from the NCI website. Treatment for adult primary liver cancer may cause side effects.
